

Our last 10 hour day of the year will be November 18.

Key Planting Dates for Winter Harvest Crops

CROP	Start Transplants	Direct Seed	August 5	August 12	August 19	August 26	September 2	September 9	September 16	September 23	September 30	October 7	October 14	October 21	October 28	November 4	November 11	Last 10-hour Day
TIER 1	Kale (Full)	•	15	14	13													
	Spinach (Full)	•	•							8	7							
	Kale (Baby)		•								7	6						
	Spinach (Baby)		•									6	5					
	Pac Choi (Full)	•						10	9	8								
	Cilantro (Full)		•					10	9	8								
	Mizuna (Full)		•							8	7							
	Salad Arugula (Baby)		•									6	5					
	Mesclun Greens (Baby)		•										5					
	Carrots		•		13	12												
	Bunching Onions (Scallions)	•			13	12												
	Swiss Chard (Full)	•	•					10	9									
	TIER 2	Lettuce (Baby)		•								7	6					
		Swiss Chard (Baby)		•								7	6					
Radishes			•								7	6	5					

Careful scheduling allows you to control growth incrementally by planting at least two or three sowings at 7- to 10-day intervals. This will allow for crops to mature at different times and provide a longer harvest period. With well-timed, staggered plantings you can create a smooth transition from one harvest to the next for a steady supply through the winter. Multiple seedings also help you identify the best seeding dates for specific crops, and spread out the risk of crop failure due to unfavorable weather conditions.
